Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Application Publication US 2002/0117115 A1, issued to Helwig, in view of U.S. Patent 6,549,502, issued to Lagasse.

The publication issued to Helwig teaches animal soothing system comprising a pet pad of soft material (interpreted by the Examiner as being structure 12; also note page 2, right column, lines 1-3) disposed within a removable cover (13); a heavy (with respect to the filler material and cover) plastic pocket (16; note page 2, right column, paragraph [0025] the pocket having an overlapping slit opening (19), being capable of positioning inside the bottom surface of the pad (interpreted by the Examiner as being structure 12; also note page 2, right column, lines 1-3).

The reference however fails to depict: a record and playback unit inserted through the overlapping slit in the pocket comprising a voice recorder, a message player that has automatic shut-off and rewind capability after a message has been played, a pressure sensing switch for activating the message player each time a pet lies on the pet pad, a recording switch member to record new messages, and is battery powered.

Lagasse teaches the use of a floor mat comprising (as noted in the abstract of the reference) a record and playback unit inserted through the overlapping slit in the pocket comprising a voice recorder, a message player that has automatic shut-off and rewind capability after a message has been played, a pressure sensing switch for activating the message player each time a pet lies on the pet pad, a recording switch member to record new messages, and is battery powered (via structure 25).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the animal soothing system of Helwig, by incorporating a record and playback unit inserted through the overlapping slit in the pocket comprising a voice recorder, a message player that has automatic shut-off and rewind capability after a message has been played, a pressure sensing switch for activating the message player each time a pet lies on the pet pad, a recording switch member to record new messages, and is battery powered (via structure 25), so as to provide for an animal or pet a soothing message, or to record the sounds of a pet.

Conclusion

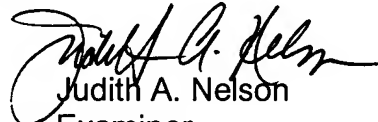

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 3,533,095; 5,033,408; 5,207,179; 4,497,989; 5,210,528.
